

USING MINECRAFT GAME IN VET TO LEARN ABOUT SUSTAINABLE CROP FARMING TECHNIQUES

Our purpose

MINECROP will demonstrate a new approach to Education and Training, which can be easily combined with Gamification and Virtual world Technology. MINECROP will design a Minecraft Environment where VET students grow their crops using sustainable practices. This will upgrade their green skills and technical capabilities to shift to a sustainable agri-system.

Who we are

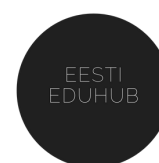

The project consortium consists of Minecraft enthusiasts, Trainers and Agriculture experts. Its structure involves different types of key stakeholders and a variety of professionals from Poland, The Netherlands, Greece, Spain, Romania and Estonia

Main results

- Minecrop Guidebook
- Minecrop Worlds in Minecraft
